The article entitled "Maintaining Sustainable, Affordable, and Low-Cost Housing for Middle- and Low-Income Classes in Uganda" is an interesting piece of work with potential meaningful impact on the low economic society.

However, the article needs revisions mainly in terms of:

1. shaping it into a standard scientific article (by reorganizing its abstract, objectives, methods, results, and conclusions),
2. strengthening each section (particularly the results section) with scientific evidence, and
3. reorganizing the conclusions based on the objectives and results.
