Potential competing interests: No potential competing interests to declare.

The assumption of "having more than 30 samples to apply parametric methods for calculating the correlation coefficients" needs to be reinforced by reference from literature.

Please also check "Power Analysis" from literature.It might be useful to check your sample size with some tools such as

https://sample-size.net/correlation-sample-size/

Please also justify the selection of depthmapX as your analysis tool , by comparing with its alternatives.
