Miniature Adult Form of AHC

National Cancer Institute

Source

National Cancer Institute. *Miniature Adult Form of AHC*. NCI Thesaurus. Code C131867.

An autosomal recessive or sporadic form of adrenal hypoplasia congenita frequently associated with central nervous system anomalies including anencephaly and pituitary defects. Histologically the adrenal gland is distinguished by the absence of fetal adrenal cortex and the presence of a small amount of normal, permanent adult adrenal cortex.
