Potential competing interests: No potential competing interests to declare.

The research topic of actors can be considered a topical issue. The study direction aims to determine the Business Performance of Micro and Small-Scale Enterprises in Arba Minch Town, Southern Ethiopia. Some key ideas to discuss with the author:

1. The abstract needs to be shortened.
2. Keywords should not use words in the article's premise.
3. The citations in the article and reference list aren't suitable; for example, Muli Emmanuel Kyalo (2016), Juliana Anyango (2015), etc.
4. Some scientific articles were published over ten years ago, so they need to be reviewed and omitted.
5. In Table 3.2, the variable of Access to Finance (ATF) has a Cronbach's Alpha coefficient of 0.92, close to 1, and needs to be reviewed.
6. Hypothesis H1 does not mention the direction of impact of the independent variable on the dependent variable.
7. The index measuring women's business performance (dependent variable WBP) has not been mentioned.
8. Lack of discussion about research results, especially the results of testing research hypotheses.
9. The conclusion does not generalize what has been done from the research results.
10. Reference articles do not observe the regulation; review and remove articles that haven't citations in the article's content.
