Dear authors,

I consider the subject approached as a topical one.

My main suggestions are as follows:

I consider that the first part of the abstract is too general, and it could be written more concisely, regarding the purpose of the article, the research hypotheses and its results.

Please outline the aim and objectives of the research in the introduction.

I think the section "Agricultural Targets of Türkiye's National Climate Change Adaptation Strategy and Action Plan 2011-2023" is too detailed, it could be summarized more.

I think it is mandatory to have a conclusion section.

I also consider it necessary to expand the literature, given all the issues presented in the introduction and in the second section.
