It's an interesting topic. I think the author should make some revisions of the organization and structure of the paper to make its argument and discussions clear and more focused. I suggest to shorten the abstract and introduction part but extend the analysis sections. In addition, some pictures listed in the paper seems not got detailed analysis in the manuscript whereas some themes of rocks arts described in the manuscript were not shown in photos of the paper. I suggest to integrate what analyzed in the manuscript well with what shown in the images of the paper.
