**Potential competing interests:** No potential competing interests to declare.

The paper has been reviewed, and the excerpt of comments is outlined in the following table.

Overall, the intention of the research is no doubt very good. It is expected that if the research is conducted carefully, the outcomes will present an outstanding contribution and add to the body of knowledge for the particular area. The paper is an original work. However, there are some comments to polish the paper's comprehensiveness and clarity. Humbly suggested that the consistency of the write-up from the objectives to the method, to the result, and to the discussion is paramount to ensure the robustness of the entire research endeavor.

No.	Section	Location/point	Comments
1	Overall	Grammar, punctuation, etc.	Please check. May use computer-assisted software or send it for proofreading.
		Plagiarism check (Grammarly.com)	4% - Ok! (including references)
2	Abstract	General	Please state clearly the objective(s) of the research – which tally with the brief finding(s) statement.
3	Introduction	Literature Review	<p>The research did not state the number/statistic for dilapidated HEIs to strengthen the research problem. If this is not available, the best way to start the research is by identifying those numbers (if possible). There are several ways to achieve this using the positivist approach:</p> <ol style="list-style-type: none"><li>1. Initially conducting a survey by HEIs as the unit of analysis – just to have the numbers, or</li><li>2. Using a similar closed-ended questionnaire script (primary) to get feedback – adding one more question towards the respondent from HEIs.</li></ol>
4	Methodology	General	Constructs' questions to achieve the stated objectives seem to lack discussion in the literature review section.
5	Results and Discussions	General	Are "causes of the poor maintenance" similar to "Challenges of facility management"?
		Table 3	Ranks for Item 1 and 2 can be distinguished by further using the standard deviation.
