Thank you very much for the opportunity to review the study.

I would like to congratulate you on your choice of topic. The topic of the study is very relevant and important. I am also working on the issue of Covid caused competency change in HR. A significant virtue and result of the study could be the development of a practical recommendation or competency model, which could give managers a practical guideline (handhold) for crisis situations. Thus, the linking of science and practice could be a major strength and outcome of this material. Thus, it may be important not only to identify competences but also to define their content in the context of a crisis.
