

# Review of: "Assessment of Microbiological Quality, Phytochemicals, Trace Elements and Proximate Analysis of Bio-Clean II Herbal Remedy"

Aleksandar Ž. Kostić<sup>1</sup>

<sup>1</sup> University of Belgrade

**Potential competing interests:** The author(s) declared that no potential competing interests exist.

## General comments:

1. Author should define botanical composition of examined product.
2. Suggest to rearrange text so first present data for chemical composition (startign with proximate analysis data) and than follow with microbiological quality results. It seems to me much more logical.
3. The rest of the comments is included in the attached pdf file.
