

Review of: "Evolution of new variants of SARS-CoV-2 during the pandemic: mutation-limited or selection-limited?"

Li Zhang

Potential competing interests: No potential competing interests to declare.

The logic of this article is clear and easy to be understood. However, the evolution of viruses is complicated. Simple models can hardly simulate or represent the real world. Different viruses have different characteristics, so for future SARS-CoV=2 variants or other types of viruses, the guiding significance of these models and hypotheses is limited.
