

Review of: "Technical and Financial Viability of a 1 MW CSP Power Plant with Organic Rankine Module: Case Study for a Northeastern Brazilian City"

Nguyen Truong

Potential competing interests: No potential competing interests to declare.

Abstract should be rewritten, and more generic results must be added.

The introduction structure needs improvement. Consider including relevant papers on the Rankine cycle in this section.

Some suitable papers to consider are:

<https://doi.org/10.1016/j.enconman.2021.113970>

<https://doi.org/10.1016/j.ijrefrig.2020.12.033>

<https://doi.org/10.1016/j.enconman.2019.112396>

<https://doi.org/10.1016/j.renene.2023.02.032>

Nomenclature table must be checked.

Title of the paper must be changed.

Throughout the entire manuscript, it is imperative to adhere to the three-line table format.

The figures in manuscript must be redrawn as they do not meet the acceptable quality standards. They appear natty and require improvement.
