

Review of: "Assessing Reliability and Economic Viability of Different EV Charging Station Configurations"

B Padmanabhan¹

¹ Anna University

Potential competing interests: No potential competing interests to declare.

How was the overall success rate of the charging station determined?

How many ports are included in the novel 56-ported design, and what type of arrangements does it incorporate?

How were cost estimation procedures implemented in the study?

What were the key findings regarding failure rates, maintenance costs, port arrangement reliability, and voltage stability?

What are the implications of the study's findings for the future development of EV charging infrastructure?
