Potential competing interests: No potential competing interests to declare.

1- The contributions are not clear. Authors should list their contributions point by point and compare them with the existing literature.

2- Please clarify the novelty of this paper with respect to the published paper.

3- The source of definition, or theorem in the paper should be indicated and given clear references. For example, ?**Theorem 2.1.**[?]?.

4- The conclusion section is missing; you can add it by reminding the reader of the mathematical apparatus used in each step and the valuable results obtained. Also, some comments and conclusions about the applicability of new results to extend the presented research analysis.
