Blastic Plasmacytoid Dendritic Cell Neoplasm

National Cancer Institute

Source

National Cancer Institute. *Blastic Plasmacytoid Dendritic Cell Neoplasm*. NCI Thesaurus. Code C7203.

A clinically aggressive neoplasm derived from the precursors of plasmacytoid dendritic cells (also called professional type I interferon-producing cells or plasmacytoid monocytes), with a high frequency of cutaneous and bone marrow involvement and leukemic dissemination. (WHO 2017)
