The research was unique and valuable for Ph.D. and Master's degrees. But maybe we can add some deep questions in the methodology section, like because we used mixed methods (qualitative and quantitative), how is the rule, quantitative complimentary qualitative or opposite?

On the other hand, we also need deep questions about the population and sample for the research as follows:

1. Why didn't you select a specific country as a case study?
2. How do you nominate African entrepreneurs for interview?
3. What are the criteria to nominate successful African entrepreneurs?
