

Review of: "Hyphae and Healthspan"

Federica Canepa

Potential competing interests: No potential competing interests to declare.

The article is well-written and divided into categories that make it fluid and interesting to read. The subject covered has been of considerable interest to research in recent years, and it summarizes all the latest findings/assumptions about Candida/Oral Health/Gut and general diseases.

Nevertheless, it should be emphasized in the title, in the abstract, and in the introduction that this information is (at the moment) only assumptions. Maybe it could be added in the title "Hypothesis"?
