

Peer Review

Review of: "Colorectal Cancer on the Rise in Children and Young Adults: A Series of Three Cases and Its Implications for Early Detection"

Tomoyuki Otani¹

1. Kinki University, Japan

The authors have submitted a revised version of the manuscript labeled "Preprint 3," which I have been able to access. However, I am unable to identify the specific changes made since the previous version. If possible, could the authors kindly provide a summary of all revisions? This would greatly facilitate the review process. Thank you in advance.

(My rating applies to the last version of the manuscript.)
