

Review of: "Mental health in fishing communities: An overview of current knowledge and information gaps for fisheries"

Kausthubh Hegde

Potential competing interests: No potential competing interests to declare.

Overall, this article is a valuable contribution to the field, highlighting crucial issues in a unique demographic. While the article excellently identifies the problem, it falls short in discussing potential intervention strategies. Future research or revisions could include a section dedicated to practical applications of the findings, such as policy recommendations or community-based mental health initiatives tailored for fishing communities.
