Potential competing interests: No potential competing interests to declare.

The article is well organised, and the flow of the writing is appropriate. However, authors need to:

1. Add references for materials and methods (Screening for AB-Phage Susceptibility, Physical Characterization of AB-Phages, Phage Morphology Examination, Bioassay of AB Phage Therapy).
2. 9/21 references are before 2014; try to add new and updated references.
3. Add limitations of the study (example: size of the isolates, other factors, etc.).
