Potential competing interests: No potential competing interests to declare.

Research on existing solutions for managing water resources in the face of declining water resources due to climate change is excellent.

The research objectives need to be more specific.

Figure 4. Location of Hanoi Capital in Vietnam and its dense river network. It is recommended that the authors choose picture 4 again to be clearer and pay attention to the picture related to the two archipelagos of Hoang Sa and Truong Sa, East Sea. Attention related to Vietnam's sovereignty over the sea and islands, research objectives, needs to be more specific.

It is necessary to analyze and discuss more than just describe the data.

These suggestions remain broad. In addition to having a solid foundation for their recommendations, the writers should provide more precise advice and link it to study findings.

In conclusion, the authors should summarize the new findings rather than re-describing the results, as well as state what limitations are needed for further research.
