Tridolgosir Hydrochloride

National Cancer Institute

Source

National Cancer Institute. *Tridolgosir Hydrochloride*. NCI Thesaurus. Code C2065.

An orally-active synthetic hydrochloride salt form of swainsonine, an inhibitor of Golgi alpha-mannosidase II. Tridolgosir inhibits formation of carbohydrate structures affecting cell-cell adhesion, resulting in decreases in tumor growth or metastasis. This agent also stimulates the immune system. (NCI04)
