

Review of: "Adoption of Technology Acceptance and Interfaces for Academic Information System Applications"

Dr. Apoorva Bhatnagar

Potential competing interests: No potential competing interests to declare.

Hi Writers

Some changes that you need to make:

1. Why are you using the acronym SIP for educational information systems?
2. The language of the hypotheses is not appropriate, especially the 4th hypothesis.
3. Discuss which sampling technique is used.
4. Do not use first person in the statements (Read section 3.1 Research Information: It took me 10 minutes to be able to complete this whole set of questions). There are other instances too in the article. Get a proper grammar and language check.
5. Cite some recent literature also.

Happy Writing!
