Potential competing interests: No potential competing interests to declare.

I consider it is a very useful article, which provides in-depth information on the topic and is correctly structured.

Introduction: The introduction presents important concepts, authors and dates that are key to understand the concepts of digital literacy and levels of digital literacy. The objective is clear and precise.

Method: the method clearly establishes the sources for the review and the instruments for the analysis.

Results: the results are presented in a systematic and precise way that responds to the stated objective. It also establishes the trends that emerged from the review of digital literacy in people with disabilities. Likewise, it establishes some important elements for future studies.

Congratulations.
