Potential competing interests: No potential competing interests to declare.

I found this paper to be an effervescent read. The author strings together his thoughts on psychoanalysis (through his use of psychoanalysts) and religion (through his use of godmen and religious scholars) in a playful-yet evocative manner. The part about the Native American leader is particularly touching - we think from here, as he points to his heart. It reminds me of what I heard recently from my psychoanalytic supervisor - 'interpretations are essentially gifts of love.'

I look forward to reading the entirety of the author's book.
