Potential competing interests: No potential competing interests to declare.

Great effort in drafting the manuscript. Some things to improve:

- a. The abstract is not concise; important information was missing (e.g., objectives, methods, results).
- b. Case studies can be better tied to the context or focus of this study.
- c. Provide implications of your study toward the betterment of open source.
- d. Adding information in the literature review and case studies can help readers better understand your study.

Best wishes.
