Thank you for giving me the opportunity to take a review. The authors wrote the manuscript with skill. The studies emphasized the status women's empowerment among the Lodha tribe. As a result, the opening section needs to feature a scenario of tribal women's empowerment and how it differs depending on the tribe from which they come. The opening should also discuss the study's significance, such as why your work is important to academics around the world. The need to clarify women's autonomy and empowerment must also be addressed.

Thank you again!
