# Indium In 111 Monoclonal Antibody BrE-3

National Cancer Institute

## Source

National Cancer Institute. *Indium In 111 Monoclonal Antibody BrE-3*. NCI Thesaurus. Code C2608.

A humanized monoclonal antibody conjugated to the imaging radioisotope (indium-111). This radioimmunoconjugate binds to the breast epithelial mucin antigen, which is found primarily on breast cancer cells, permitting radioactive immunodetection of mucin-positive tumor cells and an estimate of radiation dosimetry prior to administration of cytotoxic radiotherapy. (NCI04)
