Potential competing interests: No potential competing interests to declare.

I do appreciate the topic, which in my opinion is a very important one. Biases' negative effects can undermine the efficiency of many aspects of education. Therefore, the topic is interesting. However, I do recommend stressing more the following aspects:

-) Research gap --> please try to motivate as best as possible what the GAP is, as it is not clear what you are adding with this study
-) References seem to be dated --> Please add more references from the last 2 years
-) Make the implications clearer? --> Please try to make the article more compelling. Also, state from the beginning in the introduction the research gap and the implications?
-) Last but not least --> I could not find a proper description of the methodology. Please find other similar articles and try to see what they have done to address these issues.

Good luck!
