Potential competing interests: No potential competing interests to declare.

The subject is actual and relevant. However, I leave the following suggestions:

- Citations throughout the text must be checked, as there are several that are not well indicated;
- The research methodology followed must be better explained and justified with reference to previous works that used similar methodologies;
- In the presentation and analysis of research results, there may be a better link between the text and the various tables and figures presented in order to make the research results obtained easier to follow.
