Potential competing interests: No potential competing interests to declare.

Some the reference Ref 2, 3, 8 11, 12 are not appropriately sited and needs a correction.

It would be better to add some references especially in the introduction part paragraph one.

Line 203 please correct the spelling for under five children's.

As you mentioned residence is one of the associated factor among the determinant of vaccination in under five children's but the study is conducted in Metu town. Can you clarify on that?

Please rewrite the conclusion part again.
