Thank you for inviting me to evaluate an article entitled Application and Path: Regulation of Traditional Chinese Medicine in the Treatment of Lung Cancer. This is a useful review article that presents new ideas related to lung cancer and its treatment using natural resources. Although it is written by an individual who belongs to the undergraduate department of the Conservatory, his contribution to medical science is noteworthy. The effectiveness of these treatments has been particularly emphasized in treating non-small cell lung cancer, which is the most common type worldwide.
