AB/Tubingen Zebrafish

National Cancer Institute

Source

National Cancer Institute. *AB/Tubingen Zebrafish*. NCI Thesaurus. Code C79956.

A zebrafish line established from a group of 25 crosses between individual AB and Tubingen fish. The progeny of two crosses that lacked recessive embryonic phenotypes through 5 or 6 days of development were selected as founders of two distinct lethal free lines that were designated TAB-5 and TAB-14.
