Potential competing interests: No potential competing interests to declare.

The author presents a brief description that really sounds like a summary of some conference on Natural Polyphenols of Pomegranate and Black Tea Juices can Combat COVID-19 through their SARS-CoV-2 3C-like Protease-inhibitory Activity. I believe that you should expand the information more and specify if it is a review, which should contain more references, as well as discussions. If it is an experimental work, it must include tables, graphs and figures of the same. I believe that in the current state of the document it should not be approved for publication. Therefore, I invite the editor to reject it.
