Potential competing interests: No potential competing interests to declare.

The study aims at applying ABM models in the tourism sector. The first two sections of the article present some concepts about ABM; however, they do not indicate how the work innovates in the use of the technique in the tourism sector. There are many studies about applications of ABM in tourism which are not mentioned.

The objectives of the study and the results are not clear. The main contributions to the recent literature are not presented. The references are old and incomplete. Some figures present texts which are not in English.
