Aspergillus ustus

National Cancer Institute

Source

National Cancer Institute. *Aspergillus ustus*. NCI Thesaurus. Code C87512.

A species of fungi in the family Aspergillaceae, characterized by elongated conidial heads with bent Hülle cells scattered in a pigmented mycelium, with conidia that are large, rough-walled, and spherical and range in color from green to yellow-brown. *A. ustus* infections in humans occur mostly in immunocompromised individuals.
