Potential competing interests: No potential competing interests to declare.

The text is well written, direct and clear. However, it is necessary to include information that will help to make a greater impact and clarify the importance of this article.

It is necessary to clarify which enzymes are involved, as well as their quantities (in percentages).

This article, after adjustments, will have an important informative and scientific potential for nations.

Congratulations to the authors for their research.

There is no conflict of interest identified in relation to this article.
