Potential competing interests: No potential competing interests to declare.

After reviewing the manuscript, here are some suggestions:

1. Abstract: The abstract cannot be understood on its own; it does not contain all the relevant facts.
2. Introduction: This section needs recent studies; please add a paragraph including more updated information regarding the objective of the study.
3. Methodology and Approaches: This section needs more interpretation, and it lacks any paragraph or information about quality assurance; please add information about it in this section.
4. Results and discussion: Needs more discussion and interpretation; please rework it.
5. Conclusion: Mostly, the conclusion does justice to the work that has been done and provides a good summary.
6. Finally, the manuscript needs to be improved in the English language; please improve it.

Thank you very much for choosing me to review one of the manuscripts for your esteemed journal.
