# DNAJB1/PRKACA Fusion Gene

National Cancer Institute

## Source

National Cancer Institute. *DNAJB1/PRKACA Fusion Gene*. NCI Thesaurus. Code C122558.

A fusion gene that results from a heterozygous deletion in chromosome 19 that fuses the first 1 or 2 exons of the DNAJB1 gene in frame with exon 2 of the PRKACA gene. This fusion is associated with fibrolamellar carcinoma.
