# Sargramostim Plasmid DNA Melanoma Vaccine Adjuvant

National Cancer Institute

## Source

National Cancer Institute. *Sargramostim Plasmid DNA Melanoma Vaccine Adjuvant*. NCI Thesaurus. Code C2430.

A vaccine adjuvant consisting of a plasmid DNA encoding sargramostim (a granulocyte macrophage-colony stimulating factor). Upon administration, expressed sargramostim may stimulate a cytotoxic T cell response enhancing the host immune response to a concomitantly administered melanoma vaccine.
