An interesting research paper indeed. However more details and organized ideas would have made it so much better.

- TBLT is a recent methodology which is in vogue and it is being used on students from different educational backgrounds. Still the paper needs to talk about the importance of TBLT and what makes it stand out. Further if technology is added (to be specifically mentioned how and what technology will be used) then how it will enhance the use of the methodology in the classroom.
- Objectives of the study needs to be delineated properly.
- Review of Literature has to be included.
- Methodology also needs reconstruction.
- Tools are not mentioned properly- self made or standardized tool was used. Also whether it was an interview schedule or the number of items in the questionnaires etc.
- Analysis needs to be discussed separately. Then discussion has to be done with reference to past studies.
