Thank you for giving me the opportunity to review this wonderful piece. May I state that the title, "Augmented Reality (AR) Technology on Student Engagement: An Experimental Research Study" is good, however, the body looks like an outline. the introduction is sketchy and does not contain much information. It also does not show any sign that literature was reviewed. No problem established, no citation of any kind, methodology not clearly defined and justified and method of data analysis not explained.

Furthermore, the results and discussions are not robust. Lastly, the references, though not cited, are old and cannot give a contemporary state of AR.
