**Potential competing interests:** No potential competing interests to declare.

I would like to thank the author for responding to my comment on the first draft by including a reference to Von Mises's relationship with the Dollfuss regime when the army was used to crush Red Vienna in February 1934, as well as other examples of links between neoliberal economists and the extreme right wing. This link between neoliberal economics and military or police repression of working class organisation is underplayed in the literature.
