Potential competing interests: No potential competing interests to declare.

The authors have done a good job in this research article, shedding detailed light on the audit of the school's financial statements. The article is well written, however, I would like to suggest a few additions to improve the article.

1. Authors are encouraged to cite recent research papers relevant to the field as there is a huge gap in the literature.
2. part of the discussion is weak and should include more citations.
3. There are a number of databases where the researchers have published research articles that can be helpful in making the paper more useful and informative to readers.
