

# Review of: "A Mathematical Characterisation of COVID-19 in Mauritius"

Dr. KANAK Modi

Potential competing interests: No potential competing interests to declare.

The paper is well written. However, I have some suggestions to be implemented before publication.

- The author should correct the grammatical and typos errors.
- The motivation of the paper should be defined clearly.
- The introduction part can be improved.
- Methodology must be given with results.
- The conclusion section should be more elaborative with results obtained.
