# Review of: "The Spectral Theory Of Periodic Ordinary Differential Equations"

Adriana Buică<sup>1</sup>

1. Babes-Bolyai University of Cluj-Napoca, Romania

This paper contains useful information on second-order linear differential equations with periodic coefficients. I have the following remarks. In the first few pages, the equations are not numbered, although they are referred to in the text by number. The titles from the bibliography are not cited in the text. The author does not specify which part of the text is original.
