## Comments Report for Manuscript: Broad Immunity of *Acinetobacter baumannii* lysogens

### Comments on Abstract:

The abstract of the research article "Broad Immunity of *Acinetobacter baumannii* lysogens: Implications for Phage Therapy Strategies" should present the background, the aims, methods, results, and key findings of the study. It would enhance the clarity of the abstract's structure.

### Recommendation:

The abstract provides a solid overview of the study's scope and methods, but it could be improved to enhance its impact and clarity. The authors should consider addressing the points mentioned and refining the abstract to better convey the study's significance, methods, and findings to a wider audience.

### Comments on Materials and Methods

The "Materials and Methods" section outlines the tools, reagents, and materials used in the research process. While it provides an overview, there are several areas where clarity and detail could be improved for a better understanding of the methodology.

### Flowchart and Databases

- The description of the research process is mentioned, but it lacks a flowchart. Providing a flowchart of the research steps would help readers grasp the methodology better.

**Overall Evaluation and Recommendation** The "Materials and Methods" section provides a general overview of the tools, reagents, and materials used in the research. However, there are areas where additional details, explanations, and clarifications are needed to enhance reader comprehension. Providing a flowchart of the study would help readers understand the research process.

### Comments on Results and Discussion

The "Results and Discussion" section provides a detailed analysis of the research findings. While it presents the outcomes

of the study, there are certain areas that could benefit from further clarity and detail.

The "Results and Discussion" section has provided a comprehensive overview of the research findings and analysis.
