Potential competing interests: No potential competing interests to declare.

- Being a topical issue, the references are old.
- The method section is insufficient; the methodology used to achieve the objectives, selection criteria,... should be further explored.
- The authors use a mixed methodology, which is not explained in the corresponding section.
- The quality criteria of the article are not specified; it seems to be a narrative review.
- The references are insufficient.

For all of the above, I consider the text **NOT SUITABLE for publication in the journal, and I recommend that it be rejected.**
