# M A Radiolabeled Anti-Carcinoma

National Cancer Institute

## Source

National Cancer Institute. *M A Radiolabeled Anti-Carcinoma*. NCI Thesaurus. Code C29180.

A radiolabeled monoclonal antibody (also known as B72.3) directed against the tumor-associated glycoprotein (TAG)-72 with potential use in cancer radioimmunodiagnostics, radioimmunoscintigraphy, and radioimmunoguided surgery (RIGS). (TAG)-72 is an antigen that may be expressed by breast, colorectal, and ovarian carcinomas. (NCI04)
