

Review of: "Revitalizing Key Conditions and Integrated Watershed Management Approach to Sustain Water Availability and Agriculture in Semi-Arid Regions"

Negi Raghuveer

Potential competing interests: No potential competing interests to declare.

Concept of the article is good but there are ample possibilities to enhance quality of the article. There seems to be a lack of current research as there are very few references cited articles. There are no field photographs which create a lack of interest for readers. Abstract is too general for readers, as well introduction need improvements. conclusion is not up to the mark as it should be. Please review your abstract, Introductions, and conclusion.
