Dear researcher

I appreciate all the time that you spent for this study. however, there are some suggestion that can help you to improve your manuscript for better publishing.

1. abstract is exceeded more than 500 words, so you can rewrite it to less
2. whole manuscript has more than 8500 words which is not accepted to publish as far as I know.
3. it might be a good idea to get help of native editor for correct some mistakes in the text.
4. you can use some table and figure for visualize the data. it can help the reader to catch the eyes and intend to continue reading.
5. the conclusion part is like result one and it is completely different in two section(abstract and conclusion).
6. I hope after some revision, your manuscript get as better as possible to publish in a journal

sincerely yours,

Manizhe
